

Freeland Shooting Mats

The Freeland Shooting Mats are the best shooting mats made, and they're made in the USA by Americans.

Freeland Mats have heavy duty internal padding that will not breakdown so you do not need to worry about the padding wearing out when you put your elbows in the same spot over and over again. It's made with soil and water resistant material with sure grip gray rubber pad measuring 25" x 21" over the shooting area. It measures 26" x 6 feet long. Meets NRA, NCAA, and ISSF rules for highpower and smallbore shooting events. A quality mat with an outstanding value.

Deluxe version has two foldable leg flaps and a front flap to keep dirt off of you and your equipment.

Our tie strings are nearly unbreakable so you will always be able to roll your mat up without needing any extra hardware.

Bumpy Rubber

Gray Rubber is much cooler to shoot off of than hot black rubber when it sits out in the sun.

Water Resistant Top

Water beads up on mat's cloth surface allowing you to shake your wet mat off if you get caught in the rain.

Water Proof Bottom

Heavy water-proofing on the bottom of the mat is perfect for when you need to shoot off of damp or wet grass.

Carry All Mat

The Carry-All Mat looks just like the Deluxe Roll Up Mat however it folds into thirds instead of rolling up. It's made to carry your equipment inside the mat and has a drag strap. A very popular mat for the smallbore shooter.
